Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-10, 12-14, drawn to a coating material.

Group II, claims 15-17, 19-24, drawn to a process for coating microporous surfaces.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature common to all the independent claims is a coating material of claim 1, which is shown to be anticipated by Palazzotto et al (US 5326621). Palazzotto et al teaches dual curing coating material (See column 3, lines 23-25) comprising all claimed components: (a1) (See column 7, lines 22-26), (a2) (See column 3, lines 42-45, 59-60), and (a3) (See column 3, line 57-58; column 7, line 60). For these reasons the unity does not exist between the groups of claims.

A telephone call was made to Anne Gerry Sabourin on July 9, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
